### Note A: Summary of Significant Accounting and Related Policies

#### Basis of Preparation

These unaudited condensed quarterly financial statements should be read in conjunction with the audited financial statements for the fiscal year ended June 30, 2020 and notes included therein. The condensed comparative information that has been derived from the June 30, 2020 audited financial statements has not been audited.

Multilateral Investment Guarantee Agency's (MIGA or the Agency) condensed quarterly financial statements are prepared in conformity with accounting principles generally accepted in the United States of America (U.S. GAAP). Accounting policies used in the presentation of the interim statements are consistent with the accounting policies used in the financial statements for the fiscal year ended June 30, 2020.

The preparation of financial statements in conformity with U.S. GAAP requires management to make estimates and assumptions that affect the amounts reported in the financial statements. Due to the inherent uncertainty involved in making these estimates, actual results could differ from those estimates. Significant judgments have been made in areas which management views as most critical with respect to the establishment of the reserve for claims and the related reinsurance recoverable.

On May 12, 2021, the Executive Vice President and the Vice President and Chief Risk, Legal & Administrative Officer, authorized the condensed quarterly financial statements for issuance, which was also the date through which MIGA's management evaluated subsequent events.

#### Reporting Developments

##### *Evaluated Accounting Standards:*

In June 2016, the Financial Accounting Standards Board (FASB) issued Accounting Standards Update (ASU) 2016-13, *Financial Instruments – Credit Losses (Topic 326), Measurement of Credit Losses on Financial Instruments*. ASU 2016-13 and its subsequent amendments establish a single allowance model for all financial assets measured at amortized cost. The current expected credit loss (CECL) model, which is applicable to MIGA's Premiums receivable and Reinsurance recoverable, requires that management's estimate reflects credit losses over the instruments' remaining expected life, considering historical information, current information, and measurable and supportable forecasts. Additionally, the ASU requires enhanced disclosures about credit quality and significant estimates and judgements used in estimating credit losses. MIGA's adoption of the ASU effective July 1, 2020 did not have a material impact on the Agency's financial statements.

In July 2018, the FASB issued ASU 2018-13, *Fair Value Measurement (Topic 820) - Disclosure Framework – Changes to the Disclosure Requirements for Fair Value Measurement*. The amendments in this ASU modify the disclosure requirements on fair value measurements in Topic 820, Fair Value Measurement, based on the concepts in the Concepts Statement, including the consideration of costs and benefits. MIGA's adoption of this ASU during the quarter ended September 30, 2020, did not have an impact on its financial statements.

In August 2016, the FASB issued ASU 2016-15, *Statement of Cash Flows (Topic 230): Classification of Certain Cash Receipts and Cash Payments*. ASC 230 lacked consistent principles for evaluating the classification of cash payments and receipts in the statement of cash flows. The ASU amends ASC 230 and provides classification guidance with respect to eight types of cash flow, with the intent of reducing diversity in practice. The adoption of this ASU effective July 1, 2020, did not have an impact on MIGA's financial statements.

(Continued)

## Notes to Financial Statements

In November 2016, the FASB issued ASU 2016-18, *Statement of Cash Flows (Topic 230): Restricted Cash*. The ASU requires that the amounts of restricted cash and cash equivalents are included in the total of cash and cash equivalents at the beginning and end of the period in the Statement of Cash Flows. The adoption of this ASU effective July 1, 2020, did not have an impact on MIGA's financial statements.

### Note B: Investments

The investment securities held by MIGA are carried and reported at fair value. As of March 31, 2021, the majority of the Investments – Trading is comprised of Government and agency obligations and Time deposits (70.5% and 29.4%, respectively), with all instruments classified as Level 1 and Level 2 within the fair value hierarchy.

A summary of MIGA's investment portfolio as of March 31, 2021 and June 30, 2020 is as follows:

*In thousands of US dollars*

	<i>Fair Value</i>	
	March 31, 2021	June 30, 2020

## Notes to Financial Statements

---

***Securities Lending, Borrowing and Repurchases:***

MIGA may engage in securities lending and repurchases against adequate collateral, as well as secured borrowing and reverse repurchases (resale) of government and agency obligations and ABS. These transactions are conducted under legally enforceable master netting arrangements, which allow MIGA to reduce its gross credit exposure related to these transactions. For Balance Sheet presentation purposes, MIGA presents its securities lending and repurchases, as well as re-sales, on a gross basis. As of March 31, 2021 and June 30, 2020, there were no amounts which could potentially be offset as a result of legally enforceable master netting arrangements.

Transfers of securities by MIGA to counterparties are not accounted for as sales as the accounting criteria for the treatment as sale have not been met. Counterparties are permitted to re-pledge these securities until the repurchase date.

Securities lending and repurchase agreements expose MIGA to several risks, including counterparty risk, reinvestment risk, and risk of a collateral gap (increase or decrease in the fair value of collateral pledged). MIGA has procedures in place to ensure that all repurchase agreement trading activity and balances are always below predefined counterparty and maturity limits, and to actively monitor all net counterparty exposure, after collateral, through daily mark-to-market. Whenever the collateral pledged by MIGA related to its borrowings under repurchase agreements and securities lending agreements declines in value, the transaction is re-priced as appropriate by pledging additional collateral. As of March 31, 2021 and June 30, 2020, there were no repurchase agreements that were accounted for as secured borrowings.

In the case of resale agreements, MIGA receives collateral in the form of liquid securities and is permitted to re-pledge these securities. While these transactions are legally considered to be true purchases and sales, the securities received are not recorded as Investments on MIGA's Balance Sheets as the accounting criteria for treatment as a sale have not been met. As of March 31, 2021 and June 30, 2020, MIGA had not received securities under resale agreements.

***Credit Exposure:***

The maximum credit exposure of investments closely approximates the fair values of the financial instruments.

ABS holdings are investment grade, and therefore, do not pose a significant credit risk to MIGA as of March 31, 2021. However, market deterioration could cause this to change in future periods.

## Notes to Financial Statements

### Note C: Derivative Instruments

MIGA uses currency forward contracts, currency swaps, interest rate swaps, options, futures contracts and TBA securities to enhance the returns from and manage the currency risk in its investment portfolio.

Derivative contracts include currency forward contracts, TBA securities, swaptions, exchange traded options and futures contracts, currency swaps and interest rate swaps. Currency forward contracts, currency swaps and interest rate swaps are plain vanilla and are valued using the standard discounted cash flow methods using market observable inputs such as yield curves, foreign exchange rates, basis spreads and funding spreads.

#### *Notional Amounts and Credit Exposures of the Derivative Instruments*

The following table provides information on the credit exposure and notional amounts of the derivative instruments as of March 31, 2021 and June 30, 2020:

*In thousands of US dollars*

Type of contracts	March 31, 2021	June 30, 2020
Interest rate swaps		
Notional principal	\$ 56,400	\$ -
Credit exposure	54	-
Currency forward contracts and currency swaps

Exchange traded options and futures <sup>a</sup>		
Notional long position	33,400	32,800
Notional short position	614,900	16,000

*a. Exchange traded instruments are generally subject to daily margin requirements and deemed to have no material credit risk. All options and futures contracts are interest rate contracts.*

#### **Offsetting Assets and Liabilities**

MIGA enters into International Swaps and Derivatives Association, Inc. (ISDA) master netting agreements with substantially all of its derivative counterparties. These legally enforceable master netting agreements give MIGA the right to liquidate securities held as collateral and to offset receivables and payables with the same counterparty, in the event of default by the counterparty.

## Notes to Financial Statements

The following tables summarize information on derivative assets and liabilities (before and after netting adjustments) that are reflected on MIGA's Condensed Balance Sheet as of March 31, 2021 and June 30, 2020. The effects of legally enforceable master netting agreements are applied on an aggregate basis to the total derivative asset and liability position. The net derivative asset positions have been further reduced by the cash collateral received.

### Note E: Guarantees

#### *Guarantee Program*

MIGA offers guarantees or insurance against loss caused by non-commercial risks to eligible investors and lenders on qualified investments in developing member countries. MIGA insures investments for up to 20 years against six different categories of risk: currency inconvertibility and transfer restriction, expropriation, war and civil disturbance, breach of contract, non-honoring of a sovereign financial obligation, and non-honoring of a financial obligation by a state-owned enterprise.

MIGA considers the guarantee contracts it issues to be short-duration contracts, with the guarantees structured as short contract periods (quarterly, semi-annual and annual), and the guarantee holders generally having the ability to elect and modify or cancel contract terms and coverages at the end of each period. Short-duration contracts are contracts for which the issuer recognizes premiums received as revenue over the period of the contract in proportion to the amount of insurance coverage provided.

Premium rates applicable are set forth in the contracts. Payments against all claims under a guarantee may not exceed the maximum amount of coverage issued under the guarantee. Under breach of contract coverage, payments against claims may not exceed the lesser of the amount of guarantee and the arbitration award.

#### *Contingent Liability*

A contract of guarantee issued by MIGA may permit the guarantee holder, at the start of each contract period, to elect coverage and place amounts on current, standby and future interest. At any given point in time, MIGA is at risk for amounts placed on current. The maximum amount of contingent liability (gross exposure), representing MIGA's exposure to insurance claims (current), as well as standby and future interest coverage for which MIGA is committed but not currently at risk, totaled \$22,625,183,000 as of March 31, 2021 (\$22,593,070,000 – June 30, 2020).

The composition of MIGA's gross exposure as of March 31, 2021 and June 30, 2020 was as follows:

*In thousands of US dollars*

	March 31, 2021	June 30, 2020
Gross exposure (Maximum amount of contingent liability)*	\$ 22,625,183	\$ 22,593,070
Of which:		
Current amounts*	19,107,698	17,876,580
Standby amounts*	1,908,793	3,129,410
Future interest amounts*	1,682,707	1,625,062

\* Amounts represent maximum contingent liability under each category and are not necessarily additive.

#### *Trust Fund Activities*

MIGA also acts as administrator of some investment guarantee trust funds. MIGA, on behalf of the trust funds, issues guarantees against losses caused by non-commercial risks to eligible investors on qualified investments in the countries specified in the trust fund agreements. Under the trust fund agreements, MIGA, as administrator of the trust funds, is not liable on its own account for payment of any claims under contracts of guarantees issued by MIGA on behalf of such trust funds. Guarantees issued by MIGA on behalf of trust funds had a total outstanding gross exposure of \$24,823,900 as of March 31, 2021 (\$24,823,900 – June 30, 2020).

### Reinsurance and Other Ceded Exposures

MIGA obtains treaty and facultative reinsurance (both public and private) to augment its underwriting capacity and to mitigate its risk by protecting portions of its insurance portfolio, and not for speculative reasons. All reinsurance contracts are ceded on a proportionate basis. However, MIGA is exposed to reinsurance non-performance risk in the event that reinsurers fail to pay their proportionate share of the loss in case of a claim. MIGA manages this risk by requiring that private sector reinsurers be rated by at least two of the four major rating agencies (Standard & Poor's, A.M. Best, Moody's and Fitch). The minimum rating required for private reinsurers is A by S&P or Fitch, A2 by Moody's and A- by A.M. Best. In addition, MIGA may also place reinsurance with public insurers of member countries that operate under and benefit from the full faith and credit of their governments and with multilateral agencies that represent an acceptable counterparty risk. MIGA has established limits, at both the project and portfolio levels, which restrict the amount of reinsurance that may be ceded. As of March 31, 2021, the project limit states that MIGA may cede no more than 90 percent of any individual project. Similarly, the portfolio limit states that MIGA may not reinsure more than 70 percent of its aggregate gross exposure.

In addition, MIGA administers the Conflict-Affected and Fragile Economies Facility (CAFEF), a donor partner-funded trust fund utilizing a reinsurance structure under which MIGA issues guarantees and cedes to the CAFEF a first loss layer, for eligible projects. As of March 31, 2021, out of \$413,604,900 (\$423,159,000 – June 30, 2020) in gross exposure under this arrangement on MIGA's own account, amounts ceded to CAFEF under the first loss layer totaled \$33,022,900 (\$35,791,600 – June 30, 2020).

MIGA is also able to cede exposures to International Development Association (IDA) under the MIGA Guarantee Facility (MGF), one of the four facilities set up under the IDA18 IFC-MIGA Private Sector Window (PSW) to promote investment in IDA-only and FCS countries. Under this facility, MIGA issues guarantees and cedes exposures to IDA through a risk sharing arrangement on a first loss basis or risk participation akin to reinsurance, for eligible projects. As of March 31, 2021, MIGA's gross exposure on projects utilizing this facility was \$686,209,800 (\$587,940,000 – June 30, 2020), and the amount ceded to IDA under the first loss layer totaled \$188,662,000 (\$156,872,000 – June 30, 2020).

The table below provides a reconciliation between MIGA's gross guarantee exposure and net exposure as of March 31, 2021 and June 30, 2020:

MIGA can also provide both public (official) and private insurers with facultative reinsurance. As of March 31, 2021, total insurance exposure assumed by MIGA, primarily with official investment insurers, amounted to \$218,533,000 (\$218,533,000 – June 30, 2020).

### **Portfolio Risk Management**

Controlled acceptance of non-commercial risk in developing countries is MIGA's core business. The underwriting of such risk requires a comprehensive risk management framework to analyze, measure, mitigate and control risk exposures.

Claims risk, the largest risk for MIGA, is the risk of incurring a financial loss as a result of a claimable non-commercial risk event in developing countries. Non-commercial risk assessment forms an integral part of MIGA's underwriting process and includes the analysis of both country-related and project-related risks.

Country risk assessment is a combination of quantitative and qualitative analysis. Ratings are assigned individually to each risk for which MIGA provides insurance coverage in a country. Country ratings are reviewed and updated every quarter. Country risk assessment forms the basis of the underwriting of insurance contracts, setting of premium levels, capital adequacy assessment and reserve for claims.

Project-specific risk assessment is performed by a cross-functional team. Based on the analysis of project-specific risk factors within the country context, the final project risk ratings can be higher or lower than the country ratings of a specific coverage. The decision to issue an insurance contract is subject to approval by MIGA's senior management and concurrence or approval by the Board of Directors. For insurance contracts that are issued under the Small Investment Program (SIP), the Board has delegated approval to MIGA's senior management. In order to avoid excessive risk concentration, MIGA sets exposure limits per country and per project. As of March 31, 2021, the maximum net exposure which may be assumed by MIGA is \$1,000 million (\$1,000 million – June 30, 2020) in each host country and \$300 million (\$300 million – June 30, 2020) for each project.

As approved by the Board of Directors and the Council of Governors, the maximum aggregate amount of contingent liabilities that may be assumed by MIGA is 500 percent (500 percent – June 30, 2020) of the sum of MIGA's unimpaired subscribed capital, retained earnings, accumulated other comprehensive income (loss) and net insurance portfolio reserve plus 100 percent of gross exposure ceded by MIGA through contracts of reinsurance. Accordingly, at March 31, 2021, the maximum level of guarantees outstanding (including reinsurance) may not exceed \$29,179,463,000 (\$28,928,761,000 – June 30, 2020).

(Continued)

## Notes to Financial Statements

### Portfolio Diversification

MIGA aims to diversify its guarantee portfolio so as to limit the concentration of exposure in a host country, region, or sector. The portfolio shares of the top five and top ten largest exposure countries provide an indicator of concentration risk. The gross and net exposures of the top five and top ten countries at March 31, 2021 and June 30, 2020 are as follows:

*In thousands of US dollars*

	March 31, 2021		June 30, 2020	
	Exposure in Top Five Countries	Exposure in Top Ten Countries	Exposure in Top Five Countries	Exposure in Top Ten Countries
Gross Exposure	\$ 7,835,719	\$ 11,204,364	\$ 7,828,323	\$ 11,479,684
% of Total Gross Exposure	34.6	49.5	34.7	50.8
Net Exposure	\$ 2,226,400	\$ 3,596,847	\$ 2,199,672	\$ 3,630,888
% of Total Net Exposure	24.0	38.8	23.9	39.5

A regionally diversified portfolio is desirable for MIGA as an insurer, because correlations of claims occurrences are typically higher within a region than between regions. When a correlation is higher, the probability of simultaneous occurrences of claims will be higher.

The regional distribution of MIGA's portfolio at March 31, 2021 and June 30, 2020 are shown in the following table:

a. Includes allowance for credit losses of \$614 thousand (\$629 thousand - June 30, 2020).

b. Includes allowance for credit losses \$10 thousand (\$10 thousand - June 30, 2020).

c. May differ from the sum of individual figures shown because of rounding.

As of March 31, 2021, the excess of reinsurance recoverable associated with the retroactive reinsurance contracts over the related premium ceded amounted to \$447,600 (\$2,701,300 – June 30, 2020) and is reported as deferred gains under Other liabilities on the Condensed Balance Sheet.

The net increase in reserves for claims reflected in the Condensed Statement of Income for the three and nine months ended March 31, 2021 and March 31, 2020 comprised of changes in the Insurance portfolio reserve and Specific reserve for claims as follows:

*In thousands of US dollars*

	Three Months Ended		Nine Months Ended

(Decrease) Increase in reserves, net	<u>\$ (9,478)</u>	<u>\$ 7,597</u>	<u>\$ (1,797)</u>	<u>\$ 13,479</u>

For the three and nine months ended March 31, 2021 and March 31, 2020, MIGA's claims reserving methodology and the related significant assumptions remained unchanged.

The foreign currency translation adjustment reflects the impact on MIGA's Insurance Portfolio Reserve revaluation of guarantee contracts denominated in currencies other than US dollar and managed of by holding equivalent amounts in the same currency in the Investment portfolio. The amount by which the reserve increases (decreases) as a result of translation adjustment is offset by the translation gains (losses) on MIGA's investment portfolio and other assets, reported on the Condensed Statements of Income.

## Notes to Financial Statements

The change in Insurance Portfolio Reserve (IPR) before translation adjustments for the nine months ended March 31, 2021 and March 31, 2020 were attributable to the following factors:

*In thousands of US dollars*

	Nine Months Ended

### **Insurance Portfolio Reserve (IPR)**

The IPR reflects provisions set aside for losses and is calculated based on the long-term historical experiences of the non-commercial political risk insurance industry and the default history of the sovereigns and sub-sovereigns, adjusted for MIGA's claims history.

The following table provides an analysis of the changes in the gross IPR for the nine months ended March 31, 2021 and fiscal year ended June 30, 2020:

### *Specific Reserve for Claims*

The Specific Reserve for Claims is composed of: (i) reserves for pending claims and (ii) reserves for contracts where a claimable event, or events that may give rise to a claimable event, may have occurred, and a claim payment is probable, but in relation to which no claim has been filed. The parameters used in calculating the specific reserves (i.e., claims probability, severity and expected recovery) are assessed on a quarterly basis for each contract for which a reserve is created or maintained. MIGA's Legal Affairs and Claims Group reviews any pre-claim situations and claims filed and, together with MIGA's Finance and Risk Management Group, recommends provisioning parameters for MIGA Management to approve on a quarterly basis. MIGA's Guidelines and Procedures for Assigning Provisioning Parameters to MIGA's Specific Reserve specify the basis on which such parameters are determined.

*Claims probability:* For a contract where a claim payout is deemed probable (i.e., more likely than not), the claims probability is normally set at 75%.

*Severity:* This parameter reflects the expected quantum of MIGA's claims payment. For a contract in the claims reserve, this is typically the amount of the claim filed, whereas for an equity contract in the probable loss reserve this parameter will normally be set at 100 percent, unless there is more specific information. For contracts covering debt and loans, the parameter will be set at the percentage of the maximum aggregate liability equaling the scheduled payments in default and future payments for which a claim payment is probable.

*Expected recovery:* This parameter is expressed as a percentage of the contract's maximum aggregate liability and is based on an internal assessment of the host country's creditworthiness. For this purpose, each host country is assigned to one of four risk groups, where each group has a defined standard expected recovery level. Depending on the host country category, standard expected recovery periods are applied. In addition, for the War and Civil Disturbances, the expected recovery is assumed to be zero. Because the parameters applied in determining the Specific Reserve are based on the facts and circumstances at the time of the initial determination, subsequent quarterly re-assessment of the parameters occasionally results in an increase or decrease to the previously assessed estimates. Changes in the estimates of the Specific Reserve reflect the effect of actual payments or evaluation of the information since the prior reporting date.

Reserve for pending claims	\$ -	\$ 1,964
Probable loss reserve	18,606	20,766
Gross Specific reserve	\$ 18,606	\$ 22,730

For the purpose of short-duration contracts disclosures, MIGA's material lines of business are: Political Risk Insurance (currency inconvertibility and transfer restriction, expropriation, war and civil disturbance, and breach of contract) and Non-honoring of financial obligations.

MIGA generally creates a claim file for a policy at the contract level by type of risk coverage and recognizes one count for each claim filed by the guarantee holder and for which a claim reserve has been created. For the purposes of the claims development tables presented below, the Agency counts claims for policies issued even if the claims are eventually closed without a payment being made. For the purpose of short-duration contracts disclosures, incurred and paid claims information include both the probable loss reserve and reported claims for each accident year.

The following table presents supplementary information about average historical claims duration as of March 31, 2021:

### *Average Annual Percentage payment of Incurred Claims by Age, Net of Reinsurance*

Years	1	2	3	4	5	6	7	8	9	10
Political Risk Insurance	20%	11%	13%	14%	0%	0%	0%	0%	0%	0%

### *Current Expected Credit Loss (CECL)*

Effective July 1, 2020, the Agency adopted the CECL accounting guidance which established a single allowance model for all financial assets measured at amortized cost. The income statement effect of all changes in the allowance for credit losses is recognized in a new financial statement line item titled 'Allowance for credit losses'.

### *Determining Allowance for Credit Losses*

Determining the appropriateness of the allowance for credit losses requires management's judgement about the effect of matters that are inherently uncertain. Subsequent credit exposure evaluations consider macroeconomic conditions, forecasts and other factors.

MIGA computes a CECL allowance on the reinsurance recoverable assets in respect of the (i) IPR, (ii) retroactive reinsurance contracts and (iii) assets that relate to contracts under the Specific Reserve.

### *Reinsurance recoverable relating to IPR, Retroactive Reinsurance contracts and Specific Reserve*

CECL allowance computation is based on the modeled net expected loss on MIGA's guarantee portfolio and contracts in specific reserve, which is the Agency's expected loss on the net exposure retained after ceding to reinsurance counterparties. The estimated credit losses for reinsurance recoverable are computed at the individual reinsurer counterparty level, with the related credit ratings reviewed quarterly.

Effective January 2021, following the approval by its Reinsurer Counterparty Credit Risk Committee, the Agency adopted the application of internally determined reinsurer counterparty credit ratings for the calculation of Insurance Portfolio Reserve and related reinsurance recoverable. Previously, MIGA used S&P credit ratings through December 2020. This change did not have a material impact on the computed Insurance Portfolio Reserve and related reinsurance recoverable.

## Notes to Financial Statements

### Note G: Pension and Other Post Retirement Benefits

International Bank for Reconstruction and Development (IBRD) is the plan sponsor and MIGA, IBRD and International Finance Corporation (IFC) participate in a defined benefit Staff Retirement Plan (SRP), a Retired Staff Benefits Plan and Trust (RSBP) and a Post-Employment Benefits Plan (PEBP) that cover substantially all of their staff members, retirees and beneficiaries.

The SRP provides pension benefits and includes a cash balance plan. The RSBP provides certain health and life insurance benefits to eligible retirees. The PEBP provides certain pension benefits administered outside the SRP.

MIGA uses a June 30 measurement date for its pension and other postretirement benefit plans.

All costs, assets and liabilities associated with these pension plans are allocated between MIGA, IBRD, and IFC based upon their employees' respective participation in the plans. MIGA and IFC reimburse IBRD for their proportionate share of any contributions made to these plans by IBRD. Contributions to these plans are calculated as a percentage of salary.

The following table summarizes MIGA's respective share of the costs associated with the SRP, RSBP, and PEBP for the three and nine months ended March 31, 2021 and March 31, 2020:

Other liabilities	<u>\$ 106,141</u>	<u>\$ 100,927</u>

### Note I: Transactions with Affiliated Organizations

#### *Shared Services and Joint Business Development Agreement*

MIGA contributes its share of the World Bank Group's corporate costs. Payments for these services are made by MIGA to IBRD, International Development Association (IDA) and IFC based on negotiated fees, charge backs and allocated charges where charge back is not feasible.

MIGA transacts with affiliated organizations by entering into shared service agreements relating to administrative and shared services such as, office occupancy costs, computing services, and communication charges, among others. Transactions with IBRD and IFC include marketing fees paid for referral and due diligence services on jointly-developed guarantee projects. Transactions with IDA include premiums ceded in relation to guarantee projects written under the IDA PSW MGF.

Total fees paid by MIGA reflected in the Condensed Statements of Income for the three and nine months ended March 31, 2021 and March 31, 2020 are as follows:

*In thousands of US dollars*

	Three Months Ended		Nine Months Ended

b. This amount is included in Other assets on the Condensed Balance Sheet.

### Exposure Exchange with IBRD

During the fiscal year ended June 30, 2014, MIGA entered into an exposure exchange agreement with IBRD under which MIGA and IBRD agreed to exchange \$120 million each of notional amount of exposures on their respective balance sheets with one another. Under the agreement, IBRD provided a guarantee on principal and interest pertaining to MIGA's guarantee exposure under its Non-Honoring of Sovereign's Financial Obligation in exchange for MIGA's guarantee on IBRD's loan principal and interest exposure. As of March 31, 2021 and June 30, 2020, the outstanding off-balance sheet amounts relating to this exposure exchange agreement were as follows:

*In thousands of US dollars*

	March 31, 2021	June 30, 2020
IBRD's exposure in Brazil assumed by MIGA	\$ 33,644	\$ 46,121
MIGA's exposure in Panama assumed by IBRD	36,865	46,159
Net amount	<u>\$ (3,221)</u>	<u>\$ (38)</u>

As of March 31, 2021, the recorded liabilities related to MIGA's obligation under the existing exposure exchange agreement with IBRD amounted to \$0.2 million (\$0.2 million – June 30, 2020) and is included in the Insurance Portfolio Reserve on the Condensed Balance Sheet.

### Note K: Fair Value Disclosures

#### *Valuation Methods and Assumptions*

As of March 31, 2021 and June 30, 2020, MIGA had no assets or liabilities measured at fair value on a non-recurring basis.

#### *Due from Banks*

The carrying amount of unrestricted currencies is considered a reasonable estimate of the fair value of these positions.

Summarized below are the techniques applied in determining the fair value of MIGA's financial instruments.

#### *Investment securities*

Investment securities are classified based on management's intention on the date of purchase, their nature, and MIGA's policies governing the level and use of such investments. As of March 31, 2021, all of the financial instruments in MIGA's investment portfolio were classified as trading. These securities are carried and reported at fair value or at face value, which approximates fair value.

Where available, quoted market prices are used to determine the fair value of trading securities. Examples include most government and agency securities, futures contracts, exchange-traded equity securities, ABS and TBA securities. For instruments for which market quotations are not available, fair values are determined using model based valuation techniques, whether internally-generated or vendor-supplied, that include the discounted cash flow method using market observable inputs such as yield curves, credit spreads, and constant prepayment rates. Unless quoted prices are available, time deposits are reported at face value, which approximates fair value, as they are short term in nature.

#### *Securities purchased under resale agreements, Securities sold under repurchase agreements, and Securities lent under securities lending agreements*

These securities are of a short-term nature and reported at face value, which approximates fair value.

### Derivative instruments

Derivative contracts include currency forward contracts, currency swaps, TBAs, swaptions, and exchange-traded options and futures contracts. Currency forward contracts and currency swaps are valued using the discounted cash flow methods using market observable inputs such as yield curves, foreign exchange rates, basis spreads and funding spreads.

The following tables present MIGA'S fair value hierarchy for assets and liabilities measured at fair value on a recurring basis as of March 31, 2021 and June 30, 2020:

**Note L: Coronavirus Outbreak (COVID-19) Impact Assessment**

The outbreak of the novel strain of Coronavirus (COVID-19) resulted in governments worldwide enacting measures to combat the spread of the virus, which include the implementation of travel restrictions, quarantine periods and social distancing. These measures have caused material disruption to businesses globally, resulting in an economic slowdown, with the governments and central banks reacting with significant monetary and fiscal interventions to stabilize economic conditions.

Given these developments and MIGA's goal of mobilizing private investment for development, the Agency's role of supporting investment and job creation are more critical than ever. Responding to the crisis, on April 7th, 2020, MIGA launched a US\$6.5 billion fast-track facility to help investors and lenders tackle COVID-19. As of March 2021, MIGA has provided US\$5.0 billion for projects to mitigate the impact of the crisis in emerging markets and developing economies.

As of the reporting date, MIGA has sufficient resources to meet its liquidity requirements. MIGA's credit exposures remain within established limits and in compliance with the Agency's existing governance framework.

MIGA continues to operate under home-based work arrangements in line with the Agency's Business Continuity Procedure. Other prudent measures remain in place to ensure the health and safety of its employees, including travel restrictions, and holding of public events in virtual format, among others.

## **INDEPENDENT AUDITORS' REVIEW REPORT**

President and Board of Directors  
Multilateral Investment Guarantee Agency:

We have reviewed the accompanying condensed balance sheet of the Multilateral Investment Guarantee Agency ("MIGA") as of March 31, 2021, and the related condensed statements of income and comprehensive income for the three-month and nine-month periods ended March 31, 2021 and 2020, and the related changes in shareholders' equity, and cash flows for the nine-month periods ended March 31, 2021 and 2020 (the "interim financial information").

### **Management's Responsibility for the Interim Financial Information**

MIGA's management is responsible for the preparation and fair presentation of the interim financial information in accordance with accounting principles generally accepted in the United States of America; this responsibility includes the design, implementation, and maintenance of internal control sufficient to provide a reasonable basis for the preparation and fair presentation of interim financial information in accordance with accounting principles generally accepted in the United States of America.

### **Auditors' Responsibility**

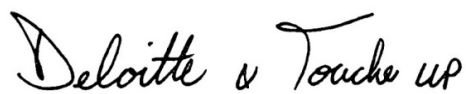

Our responsibility is to conduct our reviews in accordance with auditing standards generally accepted in the United States of America applicable to reviews of interim financial information. A review of interim financial information consists principally of applying analytical procedures and making inquiries of persons responsible for financial and accounting matters. It is substantially less in scope than an audit conducted in accordance with auditing standards generally accepted in the United States of America, the objective of which is the expression of an opinion regarding the financial information. Accordingly, we do not express such an opinion.

### **Conclusion**

Based on our reviews, we are not aware of any material modifications that should be made to the interim financial information referred to above for it to be in accordance with accounting principles generally accepted in the United States of America.

### **Report on Condensed Balance Sheet as of June 30, 2020**

We have previously audited, in accordance with auditing standards generally accepted in the United States of America, the balance sheet of MIGA as of June 30, 2020, and the related statements of income, comprehensive income, changes in shareholders' equity, and cash flows for the year then ended (not presented herein); and we expressed an unmodified audit opinion on those audited financial statements in our report dated August 7, 2020. In our opinion, the accompanying condensed balance sheet of MIGA as of June 30, 2020, is consistent, in all material respects, with the audited financial statements from which it has been derived.
