

Deniz DASTAN

Mrs Dastan has started her career at Turkish Airlines as an environmental engineer in May 2011. Following her duty as Quality Management and Development Manager which took place in 2017, she has been currently working as Corporate Sustainability Manager since 2020. She graduated from Sakarya University Environmental Engineering Department and has master degree at Business Administration from Beykent University. She manages the certification processes of the ISO 14001, ISO 14064 and IATA Environmental Assessment-IEnvA management systems at Turkish Airlines. She is responsible for environmental and sustainability issues along with the environmental management systems at Turkish Airlines. Performing evaluations, monitoring the legal laws and regulations, assessing environmental aspects and impacts of Turkish Airlines activities according to ISO 14001 Environmental Management Systems, reporting the results of assessments to the top management. Also, she is responsible for the management of the processes of monitoring, reporting, evaluating and verification of the greenhouse gas emissions according to the ISO 14064 Greenhouse Gases- Specification with guidance at the organization level for quantification and reporting of greenhouse gas emissions and removals, Carbon Offsetting and Reduction Scheme for International Aviation (CORSIA), European Union Emissions Trading System (EU_ETS), UK Emissions Trading Scheme (UK-ETS) and IATA Environmental Assessment-IEnvA Management System Program. She is in charge of monitoring and reporting the activities carried out in the organization, which are related to the climate action. The Corporate Sustainability Management bears the duty of Sustainability Committee Secretariat, in parallel with that Mrs. Dastan is responsible for following the decisions taken by the committee, reporting the projects and practices implemented by the relevant units of the company to the Sustainability Committee. She constantly follows the developments in the aviation sector and leads the communication and coordination with the relevant units in the company in terms of researching and implementing improvement projects that will increase the sustainability performance of Turkish Airlines. She is also responsible for conducting the reporting processes of Sustainability Report, Carbon Disclosure Project (CDP) and Task Force on Climate-related Disclosures (TCFD) at Turkish Airlines. Responsible for the management of the processes concerning the sustainability performance evaluations such as S&P Global/DJSI, FTSE Russell, MSCI, Ecovadis, TPI and Sustainalytics, she also conducts the improvement studies to be carried out within the Company in order to improve the ratings in these national and international ESG indexes. She makes effort to support the Company to receive global recognition for its sustainability-focused activities by the national and international sustainability recognition and award organizations or programmes.
